Laboratory Eurofins Food Testing Lisboa – Carnaxide:

The reported expanded measurement uncertainty has been estimated in accordance with ISO 19036 and is based on a standard uncertainty multiplied by a coverage factor of k = 2, providing a level of confidence of approximately 95 %. Uncertainty refers only to the determination.

The decision rule to be applied by the laboratory for the conformity assessment of microbiological results will be: the value of the measurement uncertainty shall not be taken into account in the conformity assessment. If the customer does not inform the laboratory of the need to include a declaration/conformity assessment of the results, the laboratory reserves the right to use the decision rule described above.

Caption: NE - The term "estimated number" means a less accurate estimate of the true value when the plaque count is less than 10 colonies.

The tests identified by the two-letter code XV are carried out in the permanent facilities of Eurofins Food Testing Lisboa – Carnaxide laboratory (Estrada da Outurela 118 Parque Holanda , Bloco 2 Piso 0, 2790-114 Carnaxide).
